

Cable Bolt Bulbed Bulk Pack

CABOLT1B

Product – Ø15.2 Bulbed Cable

Physical Properties

	Minimum	Typical
Yield Load at 0.2% Elongation	222kN	250kN
Tensile Strength	261kN	270kN
Elongation on 600mm Gauge Length	3.5%	5.6%
Barrel and Wedge Tensile Load (Linear)		245kN
Mass per Metre		1.13kg
Nominal Cross-sectional Area		143mm ²
Nominal Strand Diameter		15.2mm

Key Features

- Manufactured from stress relieved, low relaxation, high strength 15.2mm diameter 7 wire steel strand the cable bolt is formed by bulbing the strand into small cages, typically 26-28mm diameter, and at 1 bulb per metre.
- The cable bolt bulbs can be modified, in frequency and diameter, so that geotechnical engineers are able to design specific reinforcement products to suit ground conditions being encountered.
- Bulk cable bolts are supplied to 500m to 1300m in length.
- Surface confinement is usually provided by flat or domed plates and barrel and wedge anchors. For accessories refer to appropriate pages for slotted or multiple hole plates, barrel and wedge anchors, cable bolt spacers, grout and breather tubes.

Standard Length & Packaging

- Standard bulk lengths range from 500m to 1300m in coils.
- Specialised requirements are available by negotiation.

Notes

- When installing cable onto cable bolting machine cassettes, the bolting machine manufacturer's guidelines must be followed.
- Only DSI Underground rock bolt components should be used to enable the optimum performance of the bolt system to be obtained.
- DSI Underground is Quality Assured to ISO 9001:2015

Coiled packaging example.
