Key Features

- A general purpose and robust rotary drill bit for wet drilling. Water flushing is through the centre hole in the drill bit body for centre flush bits, through the centre hole and two side flushing grooves for flush bits, and through two side flushing grooves for side flush bits.
- Used for high thrust and impact applications.
- The spade bit uses a time proven carbide insert, has a neutral front rake and provides good wear resistance for most types of conditions.
- The drill bit body is specifically designed for clearance of rock cuttings.
- The body is made of high tensile abrasion resistant steel.
- The spade bit is often used as a “starter” bit (hole collaring) when multiple drill rods are required.
- Standard diameters available are Ø27 and Ø28mm. Other diameters from Ø26mm through to Ø30mm are available by negotiation.

Packaging

- Supplied in plastic pails containing 50 drill bits.
