

# SURFACE CONTROL PLATE

Product Code	Plate Diameter (mm)	Hole Size (mm)	Nett Weight (kg)
SCP483A35	480	45	1.26
SCP584A35	584	35	1.90

## Key Features

- The plate is used in conjunction with a roof bolt and plate to provide surface control in roof and rib support.
- The plates have a rolled edge to provide safe handling.
- The circular shape is well suited to use with long wall recovery mats due to its non snagging nature during installation.
- Available in a variety of thicknesses from 0.5mm to 1.27mm.

## Packaging

- The surface control plate is to be used as a part of a roof bolt system, positioned on the bolt between the surface and roof or rib bolt bearing plate.

## Notes

- Only DSI Underground rock bolt components should be used to enable the optimum performance of the bolt system to be obtained
- DSI Underground is Quality Assured to ISO 9001:2015, ISO 14001:2015 and AS-NZS 4801:2001
