

FRICITION BOLT DOLLIES

SIT

Handheld Machines

Product Code Guide	Spanner	Primary End	Secondary End	Length
	S	IT	FB33	180

Key Features

- These Friction Bolt installation “Dollies” were designed to suit most handheld rotary impact rock drills.
- DSI Underground Friction Bolt Dollies are manufactured from high tensile material which are then hardened & tempered to minimise breakages from impact and provide resistance to wear.
- The secondary end code designates the diameter of the friction bolt to be installed.
- The nominal overall length of the dolly is length is 180mm as standard.

Packaging

- Supplied as required.

Notes

- Only DSI Underground rock bolt components should be used to enable the optimum performance of the bolt system to be obtained.
- DSI Underground Mining Products Division is Quality Assured to ISO 9001:2015.
